

Kopernik is pleased to issue this invitation for technology proposals from local NGOs in Indonesia.

Kopernik is an on-line marketplace connecting technology, local NGOs and funders. Through the on-line marketplace, approved proposals for technology will be funded by individuals and corporations that are part of the Kopernik community.

Local NGOs can submit proposals for innovative technology featured on the Kopernik website that tackles development challenges in the following areas:

- Water and Sanitation
- Energy and Environment
- ICT & Mobile
- Agriculture
- Health
- Education

NGOs are invited to browse the available technology on the Kopernik website (www.thekopernik.org). If you have a slow internet connection, write to us at kopernik@thekopernik.org and we will email you a document listing the available technologies.

To request proposal guidelines write to kopernik@thekopernik.org
