

**Knowledge Management Consultant
for Program UNICEF – BaKTI Partnership WASH Program**

Background

Based on the Country Program Action Plan between the Government of Indonesia and UNICEF, UNICEF agrees to co-operate with BaKTI, jointly with UNICEF Makassar office, provide support to the provincial government in identifying and addressing deficits in knowledge, training or capacity towards improving key challenges to policy implementation at the district and sub-district levels and showcasing smart practices and lessons learned.

Basic sanitation access in South Sulawesi has achieved 85.40% in 2020. However, only 1.92% population in this province has access to safe sanitation (Bappeda Kab/Kota, 2020). The Government's priority as stated in the RPJMN 2020-2024 is to achieve at least 90% basic sanitation, including 20% safe sanitation. Therefore, improving the quality of sanitation access also needs to be prioritized, to also ensure that indicators of SDGs on safe sanitation are achieved.

At the same time, shift of focuses has been explored to make a 'leap-frog' on the sanitation coverage. Equity issue has been arisen, with disparities based on wealth and place of residence are pronounced, pointing to the importance of integrating equity considerations into policy and practice and further expanding the community-based total sanitation programme. Emerging issues like Resiliency Issue and Climate change on WASH have been mainstreamed to ensure rapid acceleration in sanitation and hygiene to the entire community in all setting. The existing impacts of flooding and water shortages on household sanitation and sanitation services as result of climate change are prevalent, particularly for those in vulnerable areas, like in the low income or slum areas on the coast or in low-lying flood-prone areas that were evidently most at risk. Therefore, a systematic and deliberate effort to always document the process of intervention is essential.

UNICEF is supporting the Provincial government to meet the ODF target and accelerate the adoption of safely managed sanitation. The strategy of intervention is:

- to enhance the role of province as knowledge broker to its districts to be able to improve the capacity of the stakeholders
- to utilize the available budgets more effectively and formulate evidence-based policy to achieve the specified targets, through knowledge documentation and sharing, horizontal learning, and assisted coaching.

Horizontal learning processes on Faecal Sludge Management that has been initiated since 2019 are still followed up through systematic inter-province mentoring processes between districts. South Sulawesi province's strategic position to accelerate the progress both in total sanitation and safely managed sanitation is underlined through the provision of knowledge products and learning platforms.

Thus this ToR is developed for the position of **Knowledge Management Consultant** who will support the implementation of the program specifically focusing on Water Sanitation and Hygiene (WASH).

Duties and Responsibilities

- Preparing articles or features on the activities for BaKTINews magazine and other BaKTI's publications;
- Conducting other Knowledge Management activities as per agreed work plan between UNICEF and BaKTI;
- Developing and maintaining a productive relationship within BaKTI and UNICEF team;
- Perform any other duties requested by UNICEF and BaKTI

Output

Timeline 2022	Program Activities	Output		Estimated Working Day
July	1. Training on inspection tools of Safely Managed Sanitation (SMS) for sanitarian in district Pinrang		1 article or feature	8 days
	2. Survey and data gathering using inspection tools			
	3. Rehabilitation of SNI standard septic tanks	1 straight news/ actual news		
August	1. Technical team formation meeting of UPT PALD development, district Sidrap	1 straight news/ actual news	1 article or feature	8 days
	2. Audience with Bupati/Setda or head of Pokja PKP Sidrap	1 straight news/ actual news		
	3. 1 st meeting for document preparation: academic manuscript analysis, staff analysis, and draft Perbup	1 straight news/ actual news		
September	1. Preparation of academic manuscript, staff analysis, and draft Perbup.		1 article or feature	8 days
	2. 2 nd meeting of team: exposing documents	1 straight news/ actual news		
October	1. 1 st meeting on L2T2 data base development Android base L2T2 application development 2. 2 nd meeting: exposing of the application utilization	1 straight news/ actual news	1 article or feature	8 days

November	1. Training and updating data SSK in NAWASIS system	1 straight news/ actual news	1 article or feature	8 days
	2. News and article compilation		article compilation	8 days
	Total working days			48 days
